# CERTIFICATE

The Certification Body  
of TÜV SÜD Management Service GmbH  
Trading as TÜV SÜD South Asia Private Limited

certifies that

LUBI INDUSTRIES LLP [DIV.05]

A - 2, Lubi Industrial Park, Vadsar Khatraj Road, Vadsar  
Dist. Gandhinagar- 382 721, Gujarat, INDIA

has established and applies  
a Quality Management System for

**"Manufacturing, Supply and Service of Stainless Steel  
Fabricated Submersible Pump Sets, Horizontal and Vertical  
Multistage Centrifugal Pump Sets."**

An audit was performed. Report No. 707021650.

Proof has been furnished that the requirements  
according to

ISO 9001:2008

are fulfilled. The certificate is valid in conjunction with the main-certificate from 2014-02-04 until 2017-02-03.

Certificate Registration No. 12 100 47334/02 TMS

## Stainless steel submersible bore well pumps

J & W

### Introduction

Submersible bore well pumps for 4" wells (DN 100 mm), 6" (DN 150 mm), 8" (DN 200mm) and 10" (DN 250 mm) are constructed completely out of stainless steel AISI 304 (stainless steel AISI 316 material available on request).

Sized for connection to the motor according to NEMA standards up to 8" motor joining.

Delivery casing with built-in non-return valve.

### Impellers:

#### Radial flow impellers

- 4": W1A, W2A, W3A, W5A
- 6": J6, J9, J12, J17, J17A, J20, J24, J13H, J16H, J18H

#### Mixed flow impellers

- 4": W8A, W14A
- 6": W17, W30, W46, W60
- 8": W77, W95
- 10": W125, W160, W215.

### Connection:

Screwed pipe connection with NPT thread as standard.

BSP thread pipe connection are available on request.

### Operating conditions

- Flow range: Max. 1475 USgpm
- Head range: Max. 2231 feet
- Liquid temperature: +32°F to 113°F
- Max. sand content into the water: 50 g/m<sup>3</sup>.

### Type keys

Example	W	46	-5	-A	B	N
Type range (W & J)						
Pump type						
Number of impellers						
First impeller with reduced diameter (A, B or C)						
Second impeller with reduced diameter (A, B or C)						
Stainless steel parts of material						
= AISI 304 (DIN W.-Nr. 1.4301) (Standard construction)						
N = AISI 316 (DIN W.-Nr. 1.4401)						

### Pumped liquids

These pumps are designed for liquids which are thin, clean, non-aggressive, non-explosive, not containing solid particles or fibres.

Special versions made of stainless steel AISI 316 are available for applications involving aggressive liquids.

### Curve conditions

The conditions below apply to the curves shown the following pages.

#### General

- Tolerances in accordance with ISO 9906, Annex A.
- The motors used for the measurement are standard motors.
- Test results with clean cold water, without gas content. Measurements have been made with airless water at a temperature of 68°F.
- Head and power values valid for liquids with density  $\rho = 1,0 \text{ kg/dm}^3$  and kinematic viscosity  $v = \text{max } 1 \text{ mm}^2/\text{s}$  (1 cSt).
- When pumping liquids with a density higher than that of water, motors with correspondingly higher outputs must be used.
- The QH curves apply to a rated motor speed of 3450 min<sup>-1</sup>.
- The performance curves are inclusive of possible losses such as non-return valve losses.
- A safety margin of + 2 feet is recommended for the NPSH value.

#### 4" curves

- **QH:** The curves are inclusive of valve and inlet losses at the actual speed.
- **Power curve:** The power curve shows pump power input at the actual speed for one stage.
- **Efficiency curve:**  $\eta_p\%$  shows pump stage efficiency.

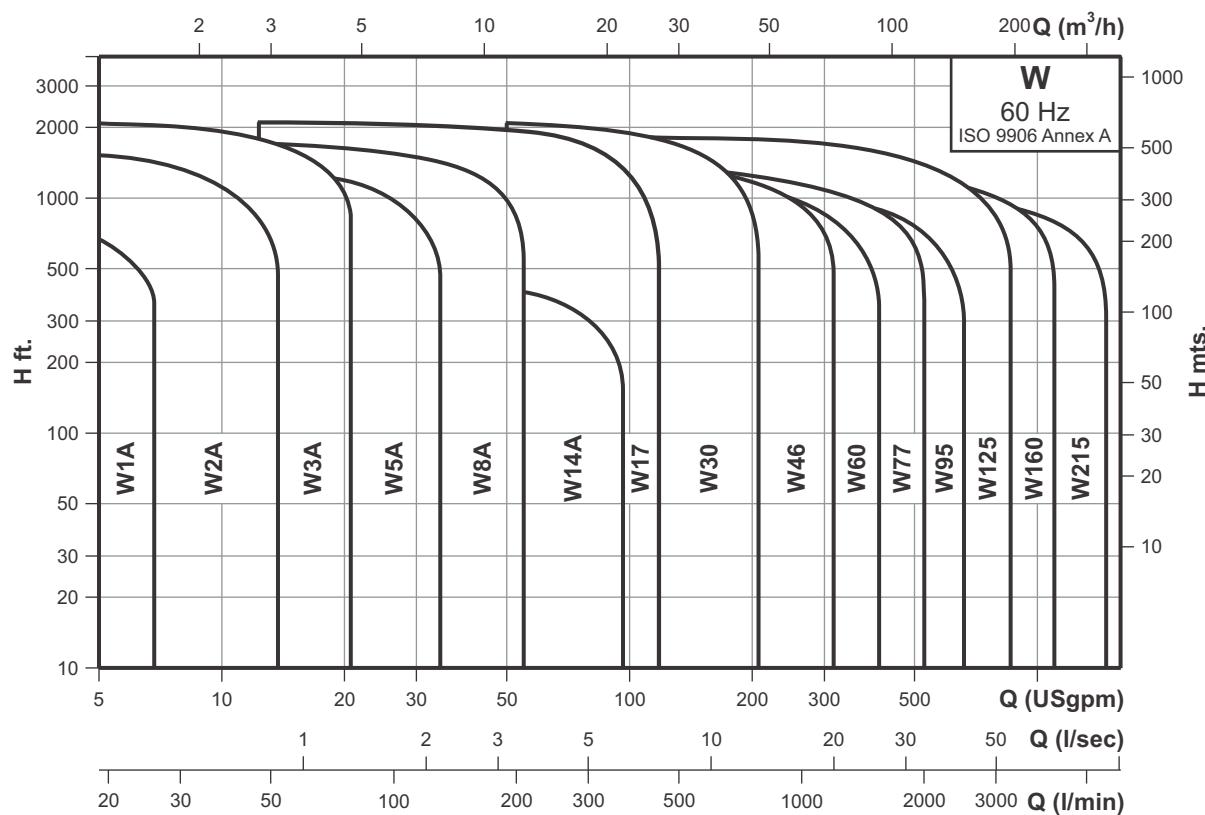

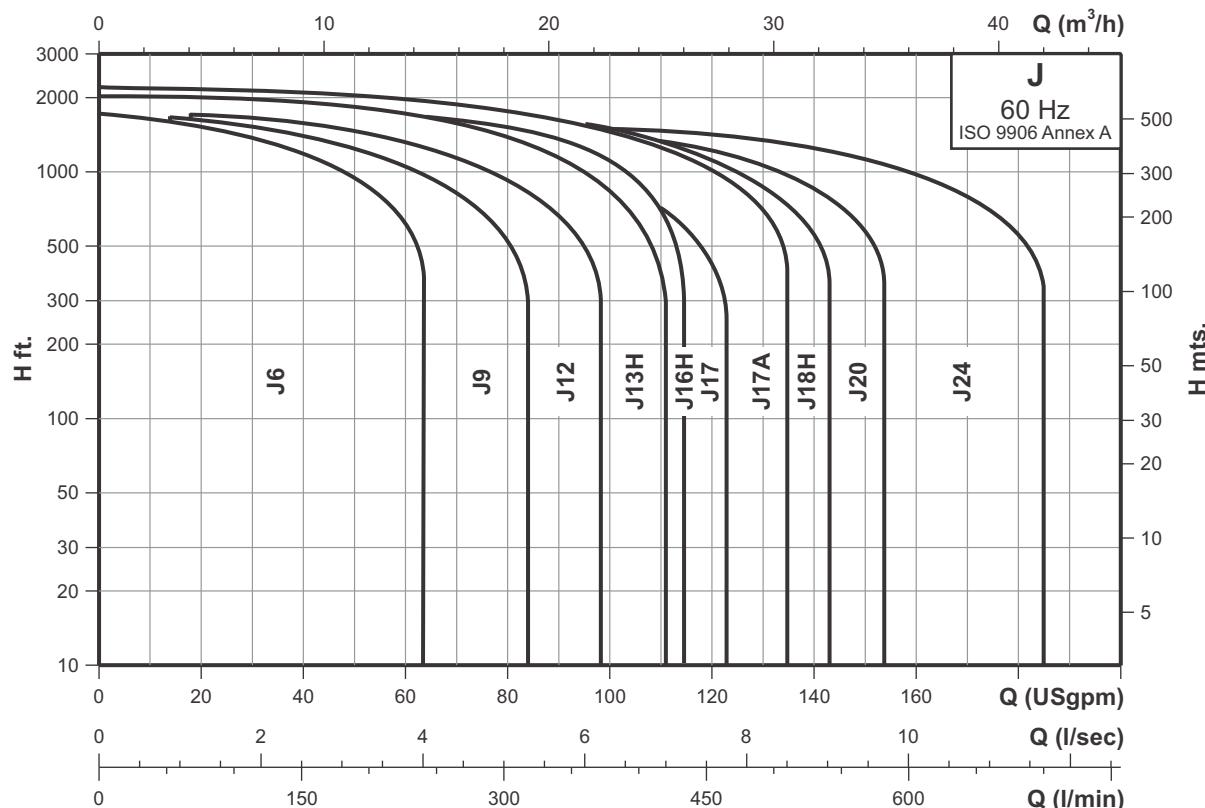

#### 6", 8" & 10" curves

- **QH:** The curves are inclusive of valve and inlet losses at the actual speed. Operation without non-return valve will increase the actual head at nominal performance by 2 to 3.3 feet.
- **NPSH:** The curve is inclusive of suction interconnector and shows required inlet pressure.
- **Power curve:** The power curve shows pump power input at the actual speed for one stage.
- **Efficiency curve:**  $\eta_p\%$  shows pump stage efficiency.

# Features and benefits

## Stainless steel submersible bore well pumps

J & W

### Meeting all your water pumping needs

The Lubi J & W series range of submersible pumps comprises a large variety of models suitable for 4", 6", 8" & 10" bore well. With flow range up to 1475 USgpm and head range up to 2231 feet. There is a Lubi stainless steel pump available for every specified duty point within this range.

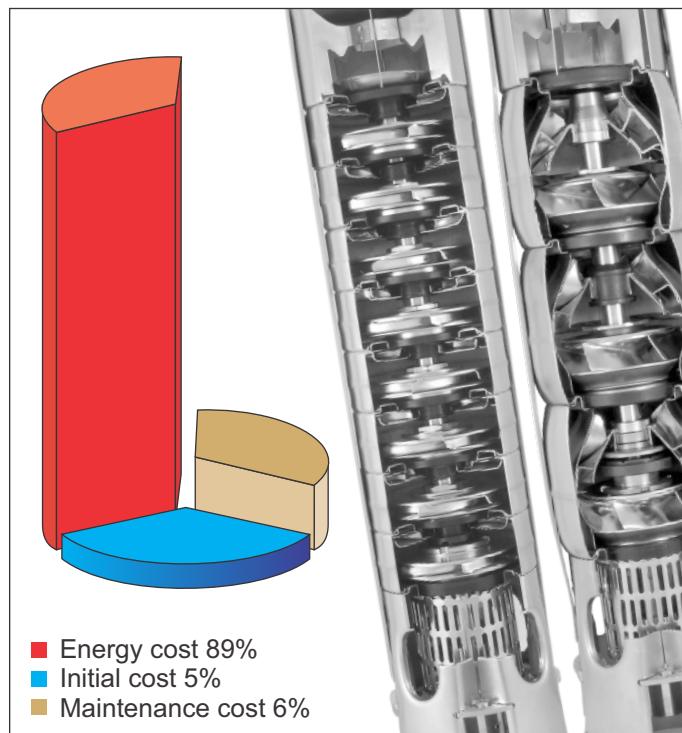

### Material & design for wear & corrosion resistance

Submersible pumps made out of materials other than stainless steel can run very well in cold, clean & clear water. However ground water contains abrasives like sand which can quickly wear out both the pump & motor. Lubi has hence designed & developed the J & W series pumps which are made completely out of high grade stainless steel & rubber of premium quality to ensure that the suspended particles do not wear out the pump.

All Lubi J & W series pumps are made entirely of stainless steel AISI 304 (DIN W. - Nr. 1.4301). For particularly aggressive liquids pumps are available in extra high grade stainless steel AISI 316 (DIN W. - Nr. 1.4401). For handling slightly contaminated water such as oil containing water we can offer all rubber parts made of Viton® as an option.

- As shown in adjoining pie chart for a typical ground water applications the initial installation cost would work out 5%, maintenance cost over the lifespan would be another 6% and energy cost will be 89% of the total cost incurred by the customer for owning & operating the pump over its entire life span.

### Minimum cost of ownership

The initial cost of purchasing a pump is a fraction of the total cost of owning & operating a pump over its entire life span.

Cost of ownership is thinking about the total cost of ownership during the entire life span of the pumps. It means that you should know and ensure that energy cost and maintenance cost which contribute 95% of the total cost of ownership is brought down as much as possible. It also means the benefits of business relationship with Lubi like assistance in making the correct decision about the selection of pumps, reliability and consistency in performance over the life span of the pumps.

- Lubi's J & W series pump can help you, bring down the operating cost by offering higher pumping efficiency due to state-of-the-art hydraulic design & usage of high grade stainless steel sheet metal which offers a very low coefficient of friction which significantly reduces energy consumption. Lubi can also help you by providing expert technical advise during selection & installation of the pump. Maintenance cost is also driven down due to high reliability of the pumps and quick response to your service calls which are attended by our factory authorized service stations.

### Reliable Consistent Performance

As the pumps are 100% made out of high grade stainless steel they can withstand the harsh abrasive and corrosive environment during its life span. The octagonal rubber bearings and built in sand protection shields are designed to ensure that sand is removed from the pump and motor by the water that is being pumped.

High efficiency in a brand new pump will not reduce cost of ownership if the efficiency starts to drop within a few days of installation. Erosion of seal rings and corrosion of metal parts are the main reasons that contribute for loss of performance & efficiency.

# Features and benefits

## Stainless steel submersible bore well pumps

Therefore the J & W series pumps are made entirely of high grade stainless steel which ensure high efficiency and low energy cost during the entire life span of the pump. In order to benefit fully from the high efficiency of Lubi J & W series pumps and motors the piping system used with the pumps should offer a very little friction loss.

Following are typical examples which show you how you can drive down the cost of ownership by installing the J & W series pumps and using the benefits of working with the installation of the pumping system.

Reduce energy cost, the best way to calculate energy cost is to measure the wire to water energy in kWh/m<sup>3</sup> or kWh/gallon which includes losses in motor, pump, cable, pipes etc. Lubi offers the J & W series pumps with one of the highest wire to water efficiencies in the industry.

Let us compare energy cost typically between a pump manufactured by say an ordinary ABC Company against the "W" series pump manufactured by Lubi.

	ABC company	Lubi
Model	XYZ	W46
HP	40	40
kW	30	30
Stage	20	20
Head	577 feet	577 feet
Flow	198 Usqpm	198 USgpm
Cost	US \$ 1300	US \$ 2260
Motor efficiency	79%	85%
Pump efficiency	60%	75%
Overall efficiency	47.5%	64%
Input power	45.43 kWh	33.72 kWh
kWh/day (For 8 hours operation)	363.44 kWh	269.76 kWh
kWh/year	132655 kWh	98462 kWh
kWh/10 year	1326550 kWh	984620 kWh
Energy cost	US \$ 165819	US \$ 123077

Saving in energy cost alone will be US \$ 42742 in the 10 years. Thus if you purchase the Lubi W46 pump then the payback period will be 82 days (less than 3 months).

### Low installation costs

Stainless steel means low weight facilitating the handling of pumps and resulting in low equipment costs and reduced installation and service time. In addition pumps will be as new after service due to the high wear resistance of stainless steel.

### Application assistance

Our well trained marketing team can assist you in carrying out a detailed analysis of your pumping requirement and make the correct recommendation after defining precise specifications required for your application.

# J & W

### Customized pumping solutions

- In case of applications where our standard range of pumps may not be suitable we can offer a number of customized solutions designed for special applications or operating conditions.
- In such cases our team of design & application engineers will understand the applications or operating conditions & work out a customized solution without compromising the high standards of performance, reliability and serviceability that we adhere to for our products.

# Design features

## Stainless steel submersible bore well pumps

J & W

### Non-return valve

All pumps are equipped with a reliable non-return valve which prevents back flow in connection with pump stoppage.

Furthermore, the short closing time of the non-return valve means that the risk of destructive water hammer is reduced to a minimum.

The valve casing is designed for optimum hydraulic properties, to minimize the pressure loss across the valve and thus contributes to the high efficiency of the pump.

### Bearings with sand channels

All bearings are water-lubricated and have a squared shape enabling sand particles, if any, to leave the pump together with the pumped liquid.

### Stop ring

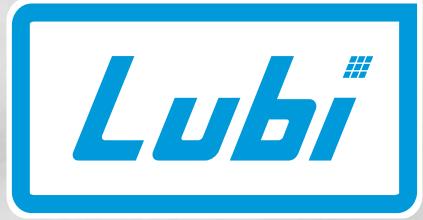

The stop ring prevents damage to the pump during transport and in case of up-thrust in connection with start-up.

The stop ring, which is designed as a thrust bearing, limits axial movements of the pump shaft.

The stationary part of the stop ring is secured in the upper intermediate chamber. The rotating part is fitted above the split cone.

### Inlet strainer

The inlet strainer prevents particles over a certain size from entering the pump.

## Stainless steel submersible bore well pumps

### Construction

- Submersible motor & pumps for deep wells of 4" (DN 100 mm).
- Sized for connection to the motor according to NEMA standards.
- Delivery casing with built-in non-return valve.
- All standard pumps are completely manufactured out of stainless steel AISI 304 sheet metal.

#### Impellers:

##### Radial flow impellers

W1A, W2A, W3A, W5A

##### Mixed flow impellers

W8A, W14A

- Connection: Screwed pipe connection with NPT thread as standard.

### Applications

- Water supply
- Irrigation
- Civil
- Industrial
- Fire fighting

### Performance range

- Flow range: Max. 96.4 USgpm
- Head range: Max. 2231 feet

### Operating conditions

- Liquid temperature: +32°F to +113°F
- Max. sand content into the water: 50 g/m<sup>3</sup>
- Max. starts per hour: 30 at regular intervals
- Direction of rotation: Clockwise as seen from the pump coupling side

### Special construction on request

- Also available in stainless steel AISI 316 material (for sea water application).
- Also available with BSP thread pipe connection.

## Stainless steel submersible bore well pumps

### Construction

- Submersible motor & pumps for deep wells of 6" (DN 150 mm).
- Sized for connection to the motor according to NEMA standards.
- Delivery casing with built-in non-return valve.
- All standard pumps are completely manufactured out of stainless steel AISI 304 sheet metal.

#### Impellers:

##### Radial flow impellers

J6, J9, J12, J17, J17A, J20, J24, J13H, J16H, J18H

##### Mixed flow impellers

W17, W30, W46, W60

- Connection: Screwed pipe connection with NPT thread as standard.

### Applications

- Water supply
- Irrigation
- Civil
- Industrial
- Fire fighting

### Performance range

- Flow range: Max. 409.5 USgpm
- Head range: Max. 2201 feet

### Operating conditions

- Liquid temperature: +32°F to +113°F
- Max. sand content into the water: 50 g/m<sup>3</sup>
- Max. starts per hour: 20 at regular intervals
- Direction of rotation: Clockwise as seen from the pump coupling side

### Special construction on request

- Also available in stainless steel AISI 316 material.
- Also available with BSP thread pipe connection.

## Stainless steel submersible bore well pumps

### Construction

- Submersible motor & pumps for deep wells of 8" (DN 200 mm).
- Sized for connection to the motor according to NEMA standards.
- Delivery casing with built-in non-return valve.
- All standard pumps are completely manufactured out of stainless steel AISI 304 sheet metal.

#### Impellers:

##### Mixed flow impellers

W77, W95

- Connection: Screwed pipe connection with NPT thread as standard.

### Applications

- Water supply
- Irrigation
- Civil
- Industrial
- Fire fighting

### Performance range

- Flow range: Max. 660 USgpm
- Head range: Max. 1427 feet

### Operating conditions

- Liquid temperature: +32°F to +113°F
- Max. sand content into the water: 50 g/m<sup>3</sup>
- Max. starts per hour: 20 at regular intervals
- Direction of rotation: Clockwise as seen from the pump coupling side

### Special construction on request

- Also available in stainless steel AISI 316 material.
- Also available with BSP thread pipe connection.

## Stainless steel submersible bore well pumps

### Construction

- Submersible motor & pumps for deep wells of 10" (DN 250 mm).
- Sized for connection to the motor according to NEMA standards up to 8" motor joining.
- Delivery casing with built-in non-return valve.
- All standard pumps are completely manufactured out of stainless steel AISI 304 sheet metal.

#### Impellers:

##### Mixed flow impellers

W125, W160, W215

- Connection: Screwed pipe connection with NPT thread as standard.

### Applications

- Water supply
- Irrigation
- Civil
- Industrial
- Fire fighting

### Performance range

- Flow range: Max. 1475 USgpm
- Head range: Max. 1772 feet

### Operating conditions

- Liquid temperature: +32°F to +113°F
- Max. sand content into the water: 50 g/m<sup>3</sup>
- Max. starts per hour: 20 at regular intervals
- Direction of rotation: Clockwise as seen from the pump coupling side

### Special construction on request

- Also available in stainless steel AISI 316 material.
- Also available with BSP thread pipe connection.

Note: ØE = For single cable motor maximum diameter of pump inclusive of cable guard.

For two cable motor maximum diameter of pump inclusive of cable guard will increase by 0.24 inch.

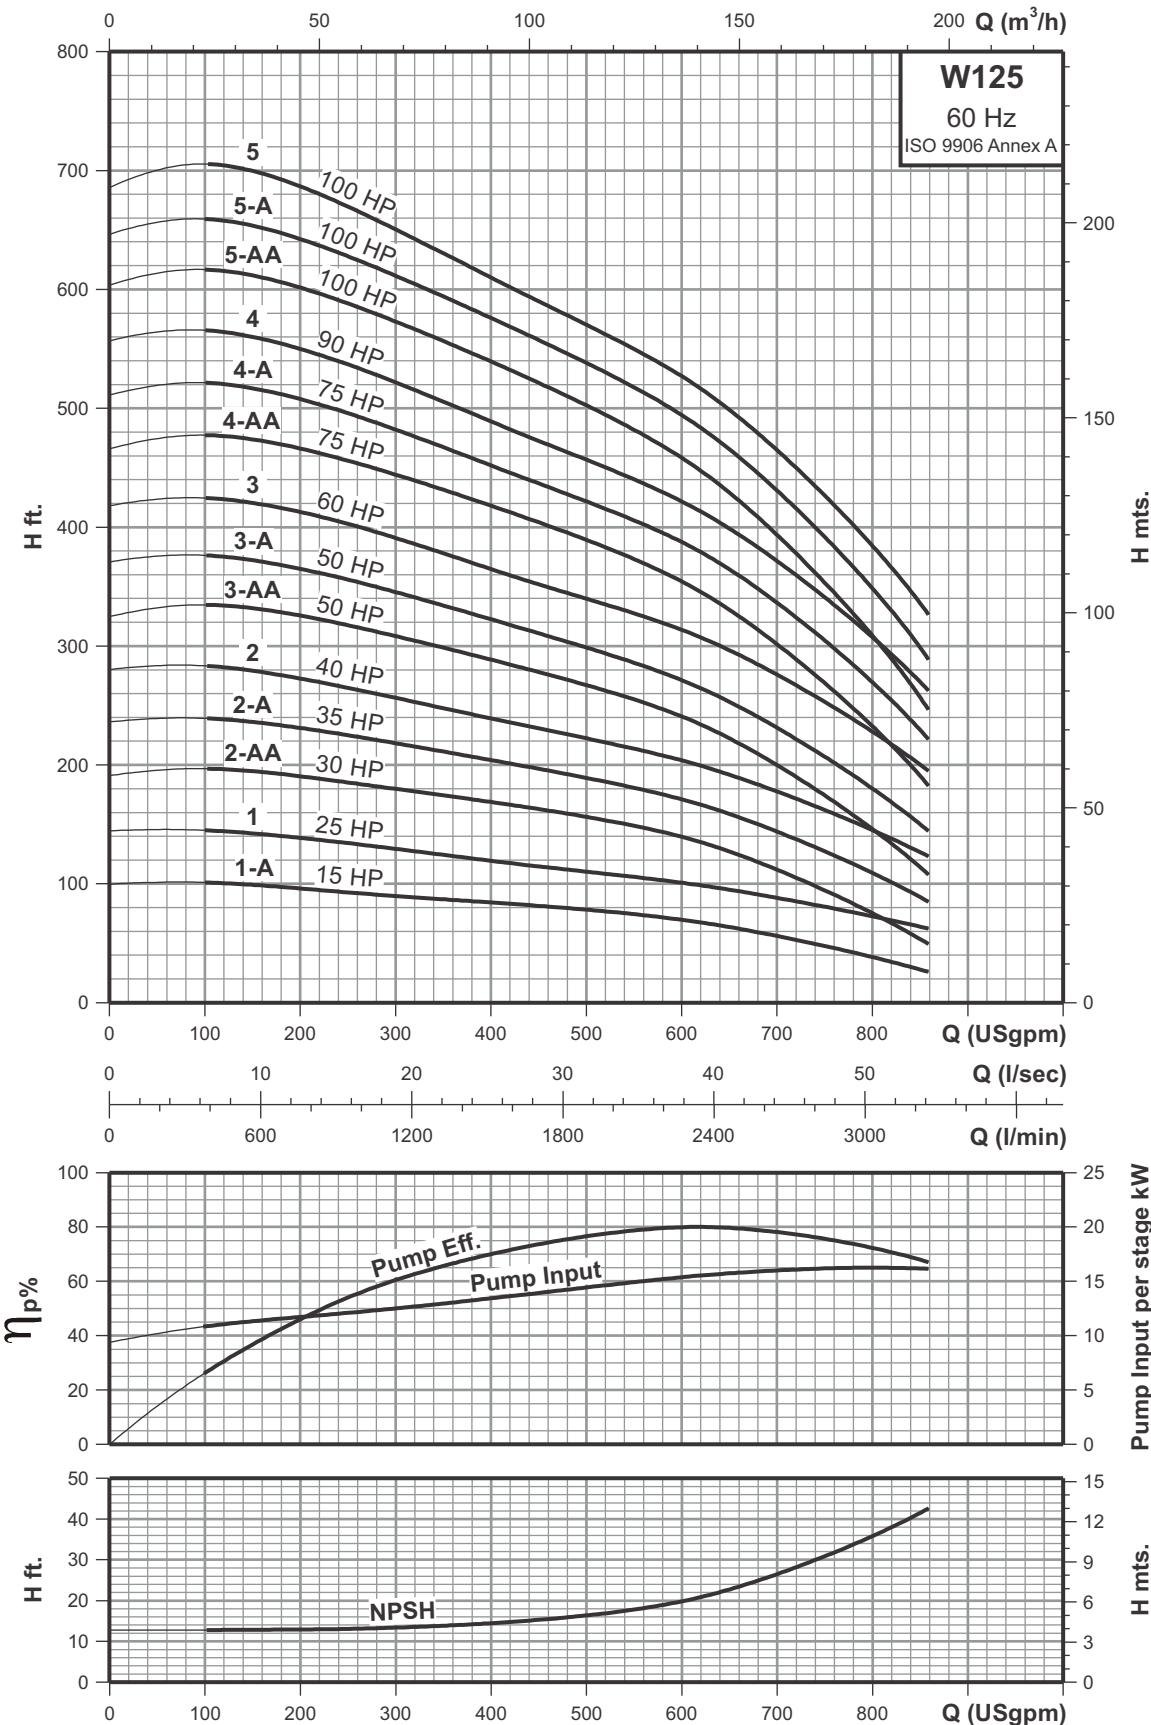

Flange connection is available on request.

All dimensions in inches unless otherwise noted.
